Test Case

Testing Scorecard

Description

This test will verify that wins and losses are tallied correctly as users play Duel Duo.

Steps

1. Navigate to Duel Duo home page.
2. Click Draw button.
3. Choose two robots and add to duo.
4. Click Duel button.
5. Take note of whether

Test Postconditions

1. When the test bots beat the computer in the duel, the wins score should increment by 1.
2. When the computer beats the test bots in the duel, the losses score should increment by 1.
3. The scores should continue to increment and not reset.

Test Plan

Overview:

Test how well Duel Duo functions.

Test Criteria:

See All Bots button shows all the bot cards
Play again! button resets game to draw step
Draw button pulls and shows 5 random bots
Clicking Add to Duo adds the selected bot to the user’s duo
Clicking Remove from Duo removes the selected bot from the user’s duo and places it back in the random lineup
Duel! button appears when two bots are added to user’s duo
The program indicates to the user whether their duo or the computer’s duo won
The wins or losses score increments based on the duel results
Clicking Play again resets the game and shows the Draw button.

Entry Criteria:

Computer for testing
Test criteria created

Exit Criteria:

Tests involving functionality of game have passed
Allotted time has passed

Other Details:

Environment: run on any browser
Game should fully function
UI should be fairly intuitive
